

# TOILET ROLL MARBLE RUN.

Fun and creative arts and crafts projects don't have to involve a cupboard full of expensive materials. This toilet roll marble run is made from items you probably already have at home (or in your recycling!). Even better is that this gives you two activities in one – making and playing!

## WHAT YOU NEED:

11 TOILET ROLLS

CARDBOARD BASE

TAPE

PAINT

GLUE

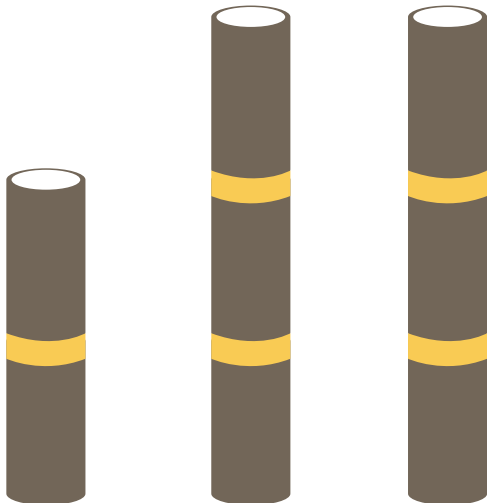

MARBLES

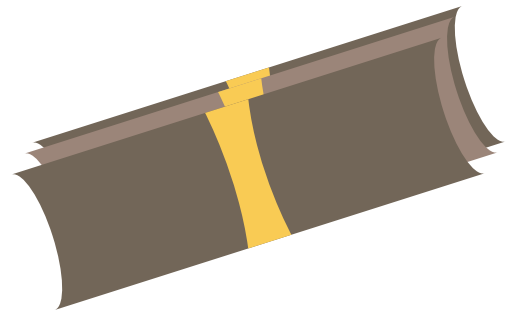

---

## WHAT TO DO:

**1** Create the towers by taping the toilet rolls together. Make one which is two rolls high and two which are three rolls high.

**2** To make the shoots that will connect the towers, cut three toilet rolls in half lengthways. Tape two halves together for each of two of the shoots, the final shoot will just be one half.

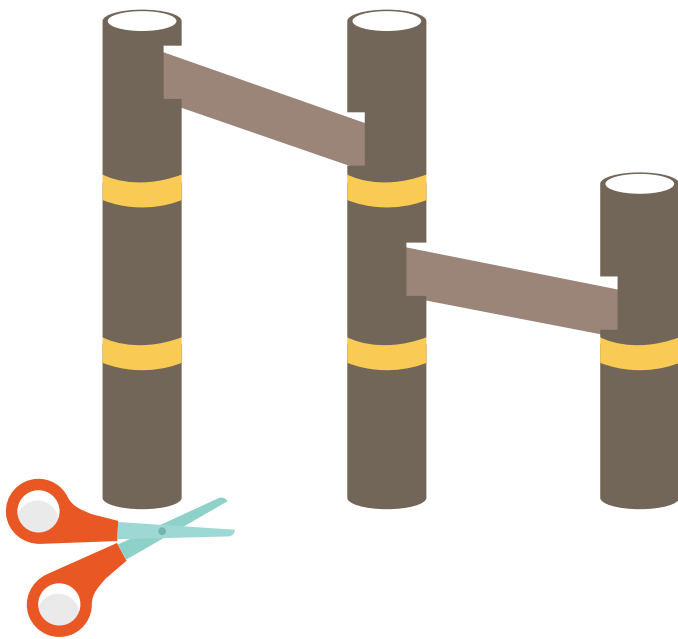

# TOILET ROLL MARBLE RUN.

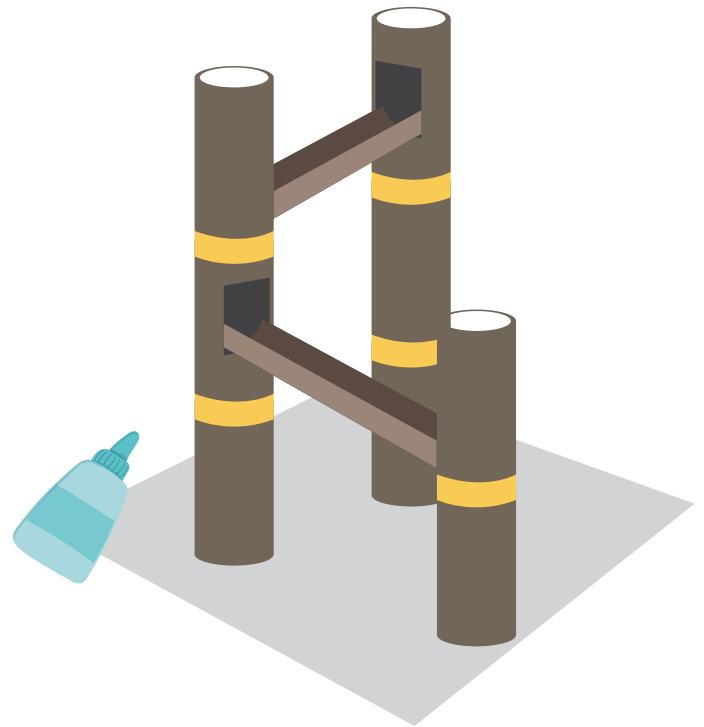

## WHAT TO DO:

**3** Cut square holes in the towers for the shoots to slot into. Make sure that the hole in the first tower is higher than the second, and the second higher than the third, so that the shoots tilt downwards. Check there's enough space for the marbles to run through while the shoots are in place.

**4** Take the cardboard base and glue the towers in place. Leave over night to dry.

**5** Paint all the parts whatever colours you like.

**6** Glue the shoots in place.

**7** Have fun with your new colourful marble run!
